SUMMARY

I build products end to end: fast web and desktop apps, AI-powered automations that remove busywork, and data pipelines and dashboards that tell teams what to do next.

That path matters: I write code with a commercial brain. I know what a funnel, a budget and a deadline look like from the inside, so the apps, automations and dashboards I build are aimed at business outcomes rather than tickets.

SKILLS

Web & App: JavaScript / TypeScript, React & Vite, HTML5 & CSS3 / Tailwind, Node.js & Express, Tauri & Rust (desktop apps), PHP & MySQL / SQL, REST APIs & Webhooks, Browser Extensions (MV3), Git, GitHub Actions, CI/CD

Data & Analytics: SQL, Excel / Google Sheets (advanced), Google Analytics 4 & Tag Manager, Looker Studio / Power BI, Python (pandas), A/B Testing & Experimentation, KPI, Funnel & Cohort Analysis

AI & Automation: LLM APIs (OpenAI, Claude), Prompt & Workflow Design, n8n / Make / Zapier, AI Chatbots & Assistants, API Integration & Webhooks, Python scripting, CRM & Email Automation, Scraping & Data Extraction

Growth & Design: SEO (technical, on & off-page), Google / Meta / LinkedIn / TikTok Ads, UI / UX Design (Figma, Adobe XD), Adobe Creative Suite, Content & Copywriting, Training & Public Speaking

EXPERIENCE

Founder & Lead Developer · Omebly — 2025 – Present · Dubai, UAE · Remote

- Architected and built the full stack: a Rust + Tauri 2 desktop app, a Manifest V3 browser extension (Chrome, Edge, Brave) and a native-messaging bridge between them.
- Implemented media detection for HLS / DASH streams, players, playlists and copy-protected (DRM) content, with yt-dlp and FFmpeg bundled and hash-pinned for reproducible builds.
- Set up GitHub Actions release builds, SignPath code signing, signed one-click updates via a custom update endpoint, and end-to-end Playwright tests against a local test site.
- Own the product beyond code: website, privacy policy, licence agreement, support and release notes. No ads, no tracking, no analytics.

Digital Marketing Manager · Essenzi Perfumes — 2024 – 2025 · Dubai, UAE

- Owned budgets and performance across Google, Meta and TikTok ads, SEO and email.
- Built reporting that combined ad-platform, analytics and sales data into one weekly view of spend, ROAS and funnel drop-off.
- Automated repetitive operations (lead routing, campaign reports, content scheduling) with scripts and workflow tools.

Digital Marketing Trainer · Spoton Training Institute — 2023 – 2024 · Dubai, UAE

- Built a curriculum covering SEO, Google Ads, social advertising, analytics and landing-page development.
- Coached learners through live campaign projects and data-driven optimisation exercises.
- Introduced Google Analytics and Looker Studio reporting modules with practice datasets.

Digital Marketing Executive · Etisalat Telecom (HACB) — 2022 – 2023 · Dubai, UAE

- Worked within strict brand, compliance and budget guidelines.
- Analysed campaign and lead-quality data to move budget toward the best audiences and creatives.
- Closed the loop with sales teams between online leads and conversions.

Digital Marketing Executive · WGCB — 2021 – 2022 · Dubai, UAE

- Set up tracking (tags, events, conversions) so every campaign was measurable end to end.

Senior Marketing Executive · Indiabulls Pharma — 2017 – 2019 · India

- Managed relationships with doctors, distributors and retail partners and tracked performance against targets.

Junior Marketing Executive · Shreya Lifescience · Raptakos, Brett & Co. · Ajanta Pharma — 2014 – 2017 · India

- Built the communication, negotiation and reporting habits that still shape how I work with clients and stakeholders.

PROJECTS

Omebly Downloader (v0.3.3, GPL-3.0-or-later) — A free, open-source Windows download manager with a companion browser extension. The extension scans every frame of a page for videos, audio, images, files, streams and playlists; the desktop app downloads them in parallel, merges streams with FFmpeg and keeps everything on the user's machine. Stack: Rust, Tauri 2, JavaScript, Chrome Extension (MV3), Native Messaging, yt-dlp, FFmpeg, GitHub Actions, Playwright, SignPath.

Omebly.com — The home of the Omebly brand: product pages, downloads, documentation, update API and contact. Designed, built and maintained by me. omebly.com/

Wand Enhancer (contribution) — Fork of an open-source C# extension that adds UX and interoperability features to a desktop app. Used to study and contribute to a .NET codebase. github.com/hussain5049/Wand-Enhancer

Marketing automation & reporting stack — Internal tooling built across my marketing roles: automated weekly performance reports, lead routing into CRMs and dashboard templates in Looker Studio.

This interactive resume — React 19 + Vite + Tailwind + Framer Motion, deployed to GitHub Pages by GitHub Actions, with a print layout that produces the PDF version. github.com/hussain5049/practice-personal-resume

EDUCATION

Bachelor of Computer Applications (BCA) · Graduated 2014
Programming, databases, data structures and software engineering fundamentals.

Self-directed engineering · Ongoing
Rust and Tauri for desktop apps, modern React, release engineering and security practices, learned by shipping Omebly.

AI & data practice · Ongoing
LLM APIs and agent workflows, automation platforms, SQL and analytics applied to real marketing and product data.

LANGUAGES

English · Hindi · Bengali

AVAILABILITY

Open to full-time, contract and remote roles. Based in Dubai and India, open to relocation.
